

AMERICAN POWER SYSTEMS, INC.

Auxiliary Power Units

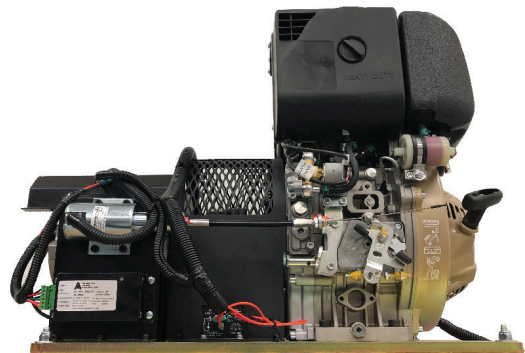

Purpose-built portable DC power generation

americanpowerinc.com
+1-563-323-7994

FEATURES & BENEFITS

- Flexible, mobile power for use in severe duty environments, on the road, or even at home
- Built atop a dependable engine platform, with APS high output alternators
- Completely customizable DC power generation
- Myriad start-up options, including app-based
- Wide range of voltage and amperage options
- Stable, continuous power generation
- For use with virtually any fuel source
- The sky's the limit!

APPLICATIONS

- Utility & work trucks
- Mining & agriculture
- Off-grid & recreation
- Aerospace & defense
- Whole or partial home backup power

OPTIONS

Fuel types	Voltage range	Amperage range
Diesel	12-48 VDC (nominal)	50-300*
Gasoline (petrol)	14-58 VDC (charging)	
Propane		
Natural gas		
Jet fuel		
Start-up options		
Wireless remote start (app)		
Push-button		
Keyed		

* High-amperage units generally require dual alternators and custom bracketry.

All APS auxiliary power units are purpose-built to meet the demands of client-specific applications. The options here are for general information. In order to prepare a quotation, APS may request that the client complete a New Project Intake Form to gather the necessary project details. Please contact your APS sales/program manager to discuss.
