POWER TO COMPLETE YOUR MISSION

TESTED TO WITHSTAND THE HARSHTEST ENVIRONMENTS

High-output alternators, dual alternator bracket kits, and high idle controllers from American Power Systems, Inc. can withstand the harshest environments to **deliver stable, dependable power** needed to make your vehicles mission ready, enabling end-users to **stay safe and connected in the field.**

To ensure APS products meet its threshold for superior quality and performance, all new products, including those for the Toyota Land Cruiser 300 and Nissan Patrol, undergo a **rigorous engineering process** and testing to **industry standards for durability.**

APS clients use its high-output alternators to energize equipment such as anti-IED jammers, communication systems, satellite equipment, cooling systems, power tools, work-truck systems and more across multiple vehicle platforms.
