

# ALTERNATORS BRACKETS & DUAL ALTERNATOR KITS

## CLIENT-CENTERED

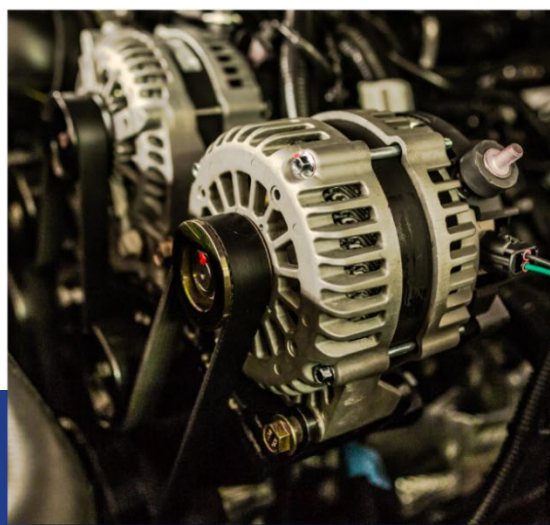

We begin every custom project with a discussion about your needs and necessary outcomes. Our program managers are tech-capable advisors who assist clients at every juncture, providing support and guidance to ensure success.

## EXPERIENCED & CAPABLE

Our engineering, design and build team brings over 100 years of experience to each conversation. Need a custom product to install yourself? Count on APS. Need assistance from start to finish, including system installation and on-vehicle testing? We do that too—and everything in between.

## FEATURES & BENEFITS

- Double a vehicle's 12V output
- Keep OEM and ancillary equipment separate—or connect systems
- Add 12V and 24V power to the same vehicle
- Get a complete, packaged system with detailed instructions

*Kits require the separate purchase of desired APS alternator.*

<b>VEHICLE APPLICATIONS</b>	<b>(Years vary by application &amp; fuel type)</b>
<b>Make</b>	<b>Models</b>
